Cognitive

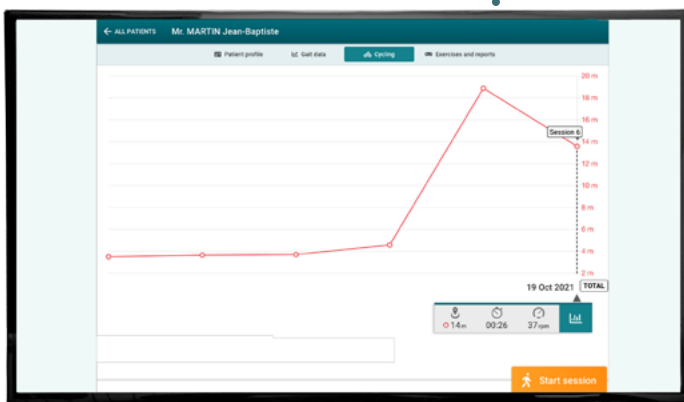

A SIMPLE AND QUICK INSTALLATION

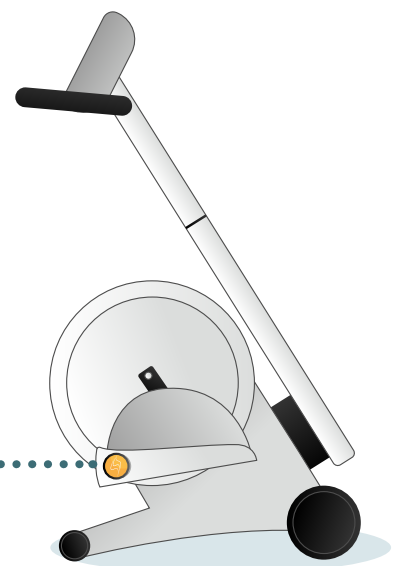

EzyGain app

CycloSense

TV

Bike

The EzyGain app on iPad connects via Bluetooth to the CycloSense sensor, which is attached to the pedal of your bike / mini rehab bike. The iPad screen can be shared on TV for a better visual experience!

Already own an EzyGain device? Everything takes place on the same centralized application.

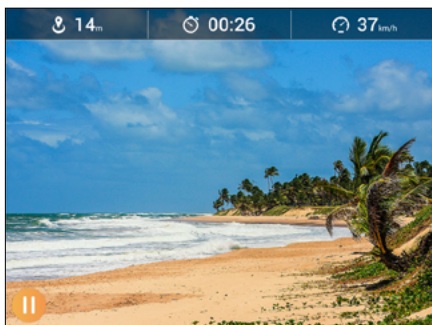

CycloSense & VR Essential

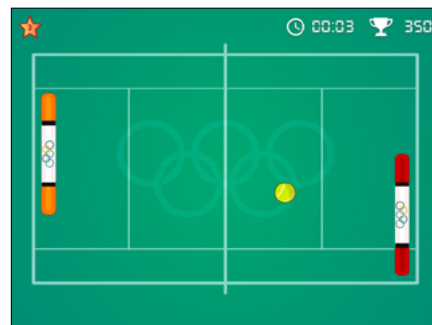

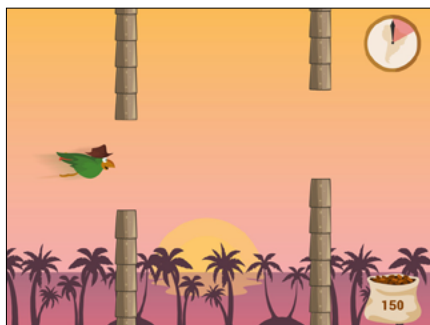

CycloSense is compatible with our virtual reality module VR Essential for an immersive 360° experience. It allows to train upper limbs, observation and cognitive skills while pedaling.

LANDSCAPES AND GAMES

- Multiple landscapes
- Personalized landscapes
- Endurance training
- Evasion

The user plays to the cognitive games while pedaling on his bike thanks to two kinds of control:

Speed (the game is controlled by pedaling faster or slower)

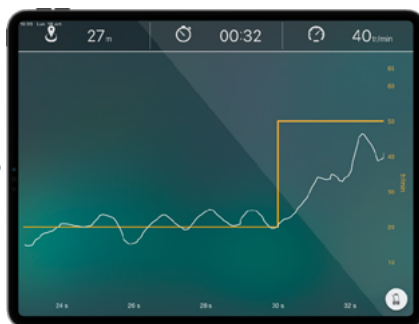

Forward/backward (the game is controlled by adjusting the position of the pedals)

BIOFEEDBACK AND INTERVAL TRAINING

Sensors attached to the pedal

- Fast and slow phase durations
- RPM goal
- Coordination

- Performance monitoring
- User profiles

PDF reports

Several bikes in the same room? Group exercises and challenges incoming!

ezyGain

One step closer to autonomy
