Assessment methods used in cognitive science, psychology, neuroscience and pedagogy
- Only taking **10 minutes** to complete
Easy to wear, Easy to use
- Providing **instant test results** after measurement

Talk Talk Brain Senior

With Talk Talk Brain Senior, seniors can take an interest in brain health.

Cognitive Function Assessment

While dementia is difficult to treat, mild cognitive impairment is treatable. Thus, regular cognitive function assessment is important.

Brain Blood Flow Function Assessment

Cerebral blood flow regulation can be impaired with autonomic nervous system dysfunction. This can impact daily life and be associated with stroke and vascular dementia.

Test Results Report

Intuitive report including cognitive function score, cerebral blood flow function score, comprehensive brain health score with graphs and ranking
